BACKGROUND OF THE INVENTION

1. Field of the Invention

[0002] This invention relates generally to computer graphics, and more particularly to a
scheme for sharing data lines in a multi-functional handheld device.

20 2. Description of the Related Art

[0003] The number of cellular phone users in the U.S. is now estimated at about 17
million and continues to grow at a rate exceeding 20 percent per year. Most of this
growth in use has occurred in and around cities and towns with populations of 20,000 or
more and has caused saturation of the channels available for cellular communication in
25 many of these urban areas. Cellular service zones servicing about eight-hundred cellular
